

## EXIHIBIT A: PROPOSED COMP PLAN AMENDMENTS

### PROPOSED CHANGES

#### ----- Page 15 -----

- **Areas to be preserved** included the marshland, downtown and historic neighborhoods, 1892 building, the Yahara River, undeveloped areas on both sides of the river, Viking County Park, and Mandt Park, Veterans Park. Most individuals wanted to see the ~~Linnerud STI Holdings, Inc.~~ property developed for residential and/or commercial uses, but some attendees indicated a desire to see the area preserved as an undeveloped natural area.
- Key **gathering places** included the downtown and Main Street, Mandt Park, Veterans Park, and River Bluff Middle School. Future gathering places were suggested for the Riverfront/ MillFab site, Kettle Park West, the ~~Linnerud STI Holdings, Inc.~~ property, and in the City's growth area to the south.
- **Transportation issues** were identified at many of the USH 51/Main Street intersections including Roby Road, STH 138, and Hoel Avenue. Numerous attendees identified the intersection of USH 51 and STH 138 as an area of concern. Roads widening or safety improvements were suggested for USH 51 and for STH 138, especially north and west of City. New roads were suggested within Kettle Park West, north of the Business Park North, and in new growth areas east of the City.
- **Bicycle lanes** were recommended on STH 138 and on City streets, including Van Buren Street, King's Lynn Road, Jackson Street, Roby Road, Page Street, and South Street. Bicycle facilities were also recommended for the rail corridor and in future City growth areas. There was strong support for **off-street trails** along one or both sides of the Yahara River. Loops trails were often recommended as opposed to straight "out-and-back" trails. Participants were also asked to identify locations that would be appropriate for new residential, commercial, or industrial development. A summary of this input is as follows. Most attendees planned for growth beyond the City's existing boundaries, but one table did not desire to City grow geographically, expressing a desire for *only* infill and redevelopment.
- New **residential development** was recommended on infill or redevelopment sites along the riverfront (including the MillFab site), in Kettle Park West, and on the ~~Linnerud STI Holdings, Inc.~~ property. Looking to the periphery of the City, there was support for new residential southwest of the current City limits (south of Kettle Park West), but there were also recommendations for residential development in areas north, south, east, and west of the City, with no clear consensus.
- New **commercial development** was recommended on infill or redevelopment sites along the riverfront (including the MillFab site), at the ~~Linnerud STI Holdings, Inc.~~ property, downtown, in Kettle Park West, and at the intersection of Van Buren and Milwaukee Streets. Commercial development was also recommended in many locations along USH 51, and where major highway intersect, e.g. where USH 51 meets CTH N, where USH 51 meets CTH B, and where CTH B meets CTH N

Finally, an area shown for *Planned Mixed Use* is located east of USH 51 between CTH B and Rutland Dunn Town Line Road. This area is part of the ~~Linnerud STI Holdings, Inc.~~ property, a larger property that is planned for a mix of commercial, public open space, and residential uses. The west side of the ~~Linnerud STI Holdings, Inc.~~ property shown as *Planned Mixed Use* on this *Plan's* Future Land Use Map. ~~, which is consistent with the 2006 Linnerud Detailed Neighborhood Plan. In this area, the Linnerud Detailed Neighborhood Plan recommends a mix of commercial and residential uses, particularly neighborhood-scale business uses, large-format retail, senior housing, multi-family, and mixed-use development.~~

### Northwest Planned Neighborhoods

There are several *Planned Neighborhood* areas on the City's northwest side that generally straddle CTH B. The part of this area is located immediately west of Sandhill Elementary School is part of the Linnerud STI Holdings, Inc. property. ~~In 2006, a Linnerud Detailed Neighborhood Plan was prepared for the entire Linnerud property. Refer to Appendix B to read the plan in its entirety. On the west side of the property, the Linnerud plan recommends a mix of commercial and residential uses, particularly neighborhood-scale business uses, large format retail, and mixed use development. In the central portion of the property, the plan recommends a large central park, which would buffer *Planned Neighborhood* areas from commercial/mixed use areas. The plan also recommends a northwest gateway feature located at southeast quadrant of the intersection of USH 51 and CTH B, which could include a pedestrian mall, framing structure that creates a focal point, water feature, and a gathering space. Finally, the east side of the Linnerud~~ The current plan for this property includes ~~is recommended for~~ commercial / mixed use along the USH 51 corridor, a large community park and residential adjacent to existing neighborhoods to the south and east; this area is shown on this *Plan's* Future Land Use Map as *Planned Neighborhood*. The Linnerud STI Holdings, Inc. development plan recommends the following for this residential area:

- The recommended residential density should be between 4 and 8 du/ac for single family detached development, 10 to 15 du/ac for two family and townhome development, ~~10 to 15~~ 15 – 30 du/ac for multi-family development, and 25 to 35 du/ac for senior housing development.
- ~~A landscape and stormwater buffer should separate the *Planned Neighborhood* from USH 51 and CTH B.~~
- Internal street connections should connect the *Planned Neighborhood* to the commercial/mixed use area to the west, CTH B, Kriedeman Drive, Kings Lynn Road, ~~and Oakridge Way~~ will accommodate a mid-block pedestrian access point or road access to planned collector.
- The *Planned Neighborhood* should include bicycle/pedestrian connection to the commercial/mixed use area to the west, the ~~central~~ community park, Sandhill Elementary School, and other destinations.

North of the Linnerud STI Holdings, Inc. property and CTH B, the Future Land Use Map depicts a *Planned Neighborhood* area north of the current City limits extending between USH 51 and Williams Drive. Nearby features include Stoughton Country Club, Christ Lutheran Church, and the railroad tracks. There are relatively few environmental constraints in this area. The area should be served by local road extensions, particularly extensions of Lincoln Avenue and Page Street, and bicycle/pedestrian connections.

### **11. Parks and Recreation**

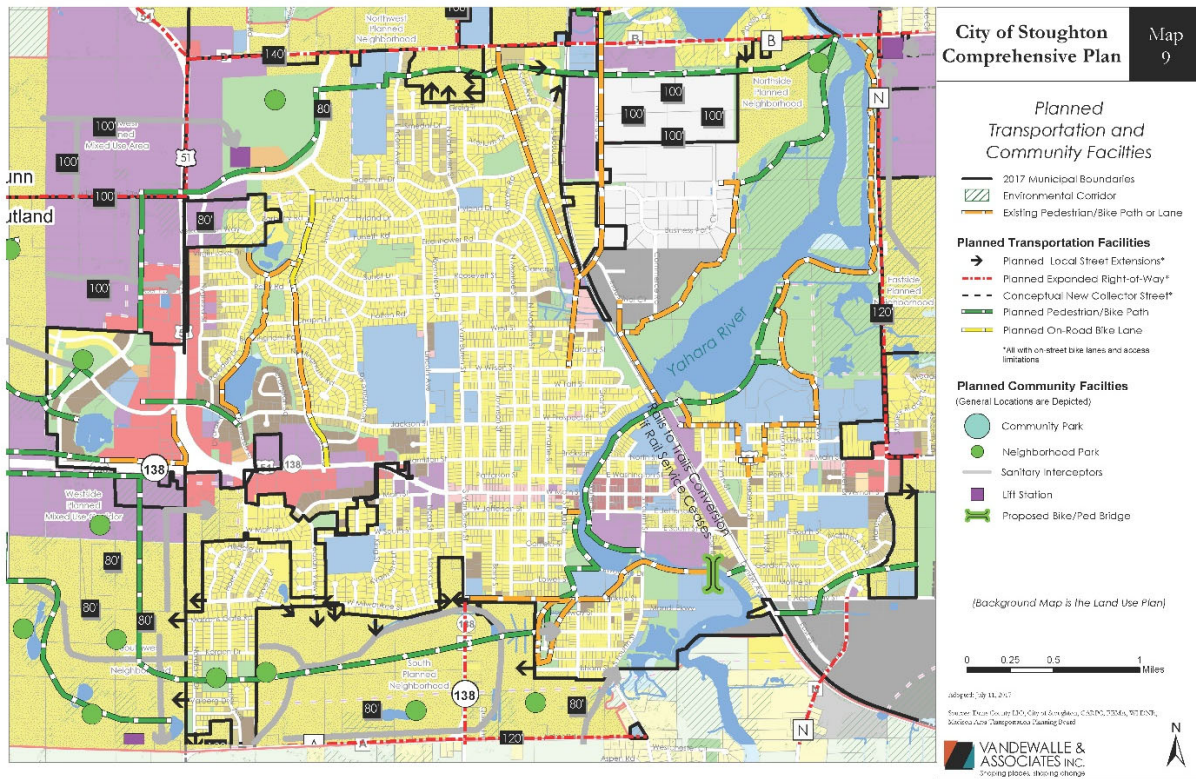

The City of Stoughton maintains an extensive parks and recreation system. As reported in the City's *2014 Comprehensive Park and Open Space Plan*, 104 acres of active and accessible public park facilities are provided by the City. According to the park plan, Stoughton is currently satisfying the recreational
